

Collaboration (0.5 pts)

Please answer the following questions in a file named `collaboration.pdf` in your `answers/` directory.

The standard [academic integrity policy](#) applies to this homework.

State whether or not you collaborated with other students. If you did collaborate with other students, state their names and a brief description of how you collaborated.

Students collaborated with: Ryan So, Miranda Zheng, Jack Zgombic

Description: We discussed our understandings of how preconditions and postconditions work and what specifically makes one stronger than the other. We also shared our understanding of how forward and backward reasoning works. We shared how we approached or comprehended some of the questions. We also talked about what we discussed and discovered during office hours.
