(1) In retrospect, what could you have done better to reduce the time you spent solving this assignment?
(2) What could the Principles of Software staff have done better to improve your learning experience in this assignment?
(3) What do you know now that you wish you had known before beginning the assignment?

- I do not believe there was any way I could have reduced the time I spent on this assignment as I spent a perfectly reasonable time on it considering the progress I made. It was hard since we had to learn Javafx with no prior experience or guidance in order to do this homework. Otherwise everything about this homework was fine considering it was extra credit.
